

Planetary Combinations, Aspects and Aspect Patterns: Inner Planets to Outer Planets

Transpersonal planets are energetically expressing archetypal and collective experiences. When an inner planet is in major aspect to an outer planet, the functions of the inner planet are entwined with the collective. The individual then must engage with the themes of that outer planet. The character of the aspect indicates if this is done in an harmonious or more challenging way.

In this 1-day workshop we will be exploring

- ❖ planetary combinations between inner planets (Moon – Mars) in their relationship with outer planets (Chiron – Pluto)
- ❖ the signs of the outer planets as indicators of their generational goals and evolutionary tasks
- ❖ issues for inner – outer planets combinations
