

# The Lunar Nodes:

## the Evolutionary Dynamics of the Natal Chart

The Nodal Axis is the meeting point of the Sun, Moon and Earth, a place where opposites come together and merge. It can be understood as the axis of tension and compulsion and relates to ideas of 'fate' and 'destiny'. The Lunar Nodes not only describes our unfinished business from the past, but also our soul's contract for further growth and development.

During this 1-day workshop we will explore

- the current position of the Lunar Nodes in Leo/Aquarius
- the Nodal axis as the place where eclipses eventuate and where we get in contact with evolutionary, collective & ancestral themes
- the karmic implications of the South Node and the purpose and potential of the North Node; balancing the nodal duality
- planets in aspect to the nodal axis; the rulers of the nodes

**April 21, 10 am – 4 pm, Lillifield Community Centre,**  
4505 Kyogle Rd; \$ 70, conc \$60  
please bring your chart along or contact me for a print-out
