

# A Change in Frequency: Uranus in Taurus & Chiron in Aries

Uranus, the God of the starry skies & symbol for the yang principle, enters Taurus, the most earthy and feminine sign in the zodiac on May 15, just 4 weeks after the entry of Chiron into Aries. Uranus opens up new territory, new dimensions of consciousness, while Chiron's task is to confront us with the shadow sides and weaknesses that need integration, purification and healing.

During this 1-day workshop, we will explore the significance of these planetary shifts, their challenges as well as their creative potentials for our personal & collective lives.
