

# Soul Astrology, Emotional Well-Being and Australian Bush Flower Essences

The vibrational patterns of experience are stored in the astrological Moon. The Moon is the 'Inner Child' who retains the emotional imprints from childhood, starting with those that were formed in the womb. *The Moon is the carrier of our emotional memory.*

The Moon placement gives information about our bodily impulses and automatic reactions, how we approach new tasks (together with the ascendant) and what we needed and need in order to feel nurtured. The Moon placement tells us what we require when in crisis or in stressful situations.

In this workshop we will explore:

- the 12 Moon signs, their basic qualities and characteristics;
- emotional imprints and their themes as revealed in the birth chart by Moon sign and aspects
- how Australian Bush Flower Essences can address potential weaknesses and enhance the strength of each Moon sign.
