

Astrology & the Healing Arts

The words heal and whole derive from the same source. Healing requires the discovery and embodiment of our spiritual identity. This is why Astrology can support the healing process by providing a sacred, meaningful context for our experiences, a sense of purpose and direction, as well as a reminder of our connection to a larger whole. The symbolic language of astrology can be applied in different ways. On the physical level, the birth chart can indicate the body systems most prone to stress as well as the specific time periods when they would be most vulnerable.

In this workshop we will explore:

- ❖ houses of health
- ❖ planets, their functions & dysfunctions in health & healing
- ❖ underlying psycho-spiritual programming and its body/soul-mind connection
